

### FOSC-915-PC

#### Features:

- This unit is made of enhanced PC plastic safeguarding both the internal and external components against corrosion.
- The product is age resistant protecting against all weather conditions.
- State of the art sealing technology allows the unit to be reopened. It also includes a reuseable self adhesive rubber strips. The silica gel ensures that the product will seal air tight and remain water resistant.
- There are 2 inlets and 2 outlets, that enable the unit to meet most requirements.
- The device does not require specific tools allowing for easy installation.
- Due to the cascading structure of the Splice Tray, the need for an additional splice tray is obsolete.

ITEM	DESCRIPTION
Material	PC
Dimension (mm)	250 * 190 * 75
Dimension (inches)	9.85 * 7.50 * 2.95
Weight (kg)	1 kg
Max. Diameter of Cable (mm)	16
Cable Ports	4
Max Capacity	48 Core
Single Tray	12 Core

Application of Temperature: -40° C - 65° C

Scope of Application: Aerial, Direct Buried, Wall and Duct Mount
